⚡ About Me

I build things that live on the internet — and I build them fast. Mechanical Engineering student by day, full-stack developer by passion. I turn ideas into responsive, real-world web apps using clean code and strong instincts. Currently levelling up in full-stack development and cybersecurity, with an eye for UI/UX that actually makes people say “wow.” I don’t just write code — I ship experiences.

🚀 Projects I've Shipped

Job Portal Frontend UI

July 2025

Live Demo → <https://raghuraman206.github.io/Job-Portal-Frontend-UI/>

- ▶ Designed and built a fully responsive job portal from scratch — zero frameworks, pure HTML/CSS/JS.
- ▶ Engineered dynamic job listings, smart filter options, and a clean application form with real UX flow.
- ▶ Mobile-first architecture: pixel-perfect across every screen size and device.
- ▶ Shipped clean, maintainable code with intuitive UI that doesn't make users think twice.

Personal Developer Portfolio

2025

Live Demo → <https://raghuraman206.github.io/raghu-portfolio/>

- ▶ Built and deployed a personal portfolio site that tells my story as a developer.
- ▶ Crafted with HTML, CSS, and JavaScript — smooth navigation, clean layout, zero bloat.
- ▶ Optimised for performance and accessibility across all major browsers and screen sizes.
